EDUCATION

University at Albany, State University of New York

Degree: B.S. in Computer Science and Applied Mathematics | **Minor:** Math | **GPA:** 3.79

Albany, NY

Graduated May 2025

Professional Experience

Full Stack Developer, Cook Systems (FastTrack IT Program)

July 2025 – Sep 2025

Java, Spring Boot, JavaScript, Angular, PostgreSQL

Memphis, TN

- Built a Twitter-clone REST API with 30+ endpoints and PostgreSQL persistence validated functionality with 300+ automated tests.
- Developed an Angular trivia game with modular UI components, API integration, persistent local storage, and time-based scoring logic.
- Created a web app to compare GitHub profiles by integrating GitHub's API, caching responses to optimize performance.
- Designed and implemented database schemas from ERDs, ensured exception handling and validation across projects.
- Collaborated in teams of 2–3; presented final projects to the cohort, demonstrating application features and code quality.

Research Assistant, The Research Foundation for SUNY

March 2025 – May 2025

Python, Pandas, NumPy, Matplotlib

Albany, NY

- Tasked with processing and analyzing air quality data across 15+ monitoring locations in New York.
- Optimized legacy processes by automating Python pipelines to validate, visualize and clean datasets of 16,000+ rows, saving hours of repetitive work.

Entrepreneurial Experience

Founder/Full Stack Developer, Your Bis

May 2025 – Present

JavaScript, TypeScript, Cloudflare, AWS, Next.js

Queens, NY

- Engineered robust, self-hosted Linux API servers to deliver secure and high-performance web services.
- Helped clients increase sales by 35-80% by building websites and integrating Cloudflare and Google Analytics for real-time visitor metrics, persisting data in DynamoDB.
- Built an API service, implementing encrypted connections and token-based authentication; ensuring all client endpoints are secured and accessible by users with proper permission.
- Managed deployments and site monitoring with 99% uptime using Cloudflare tunnels; leveraged image compression and Cloudflare CDN's, resulting in 60% faster page-load times and improving SEO.
- Collaborated with a partner on client outreach and analytics. Secured initial seed revenue via monthly plans from \$35-\$90.

Founder/Development Lead, Forgotten Pantheon

March 2019 – August 2022

C#, Java, MySQL, Redis, .NET

Remote

- Developed and launched a flash game private server, serving a community of 6000+ members in multiple regions (Americas, Europe, and Asia-Pacific) and over 100K views on combined YouTube videos.
- Migrated an entire database from XMLs to SQL, improving query performance up to 200 times, while reducing space and memory cost by 85%.
- Led a rotating team of 10-20 developers and artists, releasing new content and features on a steady schedule.
- Achieved 15-35% monthly player growth consistently over my ownership generating approximately \$10,000 in ARR.
- Exited the project for \$10,000 while in college to support college expenses while continuing coursework.

Projects

'SHANK' JAVA Language Compiler ➔

- Developed a compiler in Java featuring loops, data types, recursion and function calling.
- Implemented lexical analysis, tokenization, parsing with recursive descent and intermediate code generation.

YRBIS (Local Business App) ➔

- Developed a full-stack local service application using React/Expo for the front end, utilizing AWS for serverless backend and real-time data persistence.
- Integrated OpenAI's API to provide AI-assisted content creation for optimized service postings.

Technical Skills

Programming Languages: Java, JavaScript, C#, Python.

Technical Stack: AWS (DynamoDB, EC2, Lambda, S3), Cloudflare, React, Angular, Spring, HTML, CSS, .NET, Git, SQL, GitHub.

Other: MS Office, ETL Processes, Power BI, Tableau Public, Docker, K8s.
